

**Award-winning audio. Served the way you like it.**

AKG N30 headphones place awesome Hi-Res audio right between your ears, with hybrid drivers made of a BA and a dynamic driver providing a warm bass response, as well as clear mids and highs. In addition, two filters let you customize the output to your liking. They also feel as superior as they sound: the acoustic tube is tilted to take the shape of your ear, and super-soft silicon ear-tips in 4 different sizes ensure the headphones fit you snugly. A detachable tangle-free fabric cable with universal remote/microphone helps keep you totally in control of your sound.

**FEATURES**

- ▶ Hi-Res Audio Support
- ▶ Customizable Audio
- ▶ Comfort-Driven Design
- ▶ Detachable cable with universal remote/microphone
- ▶ Premium materials

## FEATURES AND BENEFITS

### ► Hi-Res Audio Support

Thanks to Hi-Res solution audio support, you can now capture all the details hidden in a music track – from the subtleties of an instrument to a barely-whispered lyric – and enjoy sound as the musicians and engineers originally intended it.

### ► Customizable Audio

A pair of exchangeable sound filters let you switch between reference and bass, which means you can customize audio output to your liking.

### ► Comfort-Driven Design

The acoustic tube is designed to take the shape of your ear, and super-soft silicon ear-tips in 4 different sizes ensure these headphones fit you snugly.

### ► Detachable cable with universal remote/microphone

Customize your headphone by changing to the cable of your preference, or just use the one we included with a universal remote/microphone. The connector type is MMCX.

### ► Premium materials

Enjoy an indulgent audio experience heightened by the use of durable fabrics and a complete set of accessories like the flight adaptor, the cleaning tool and the premium carrying case.
